SITEC to Continue Rapid Growth at Maryland's Cyber Incubator *Cambridge Maryland based Cyber Application Development Company to double headcount*

Baltimore MD (August 25, 2011) SITEC Consulting, a minority-owned SBA Certified HUBZone company and winner of the TEDCO Incubator Award, has joined the Cyber Incubator at the bwtech@UMBC Research and Technology Park. SITEC's focus is to transform cyber architectures in the cloud to support cyber defense. SITEC helps build distribution-type architecture which allows the company to take data from different places and share the data with clients in real time, enabling information from cyber defense systems to be analyzed quickly.

bwtech@UMBC's strategic location in a HUBZone and its affiliation with UMBC, a campus producing many talented graduates with technology and cyber security backgrounds, led SITEC's decision to move their company into the Cyber Incubator space. SITEC does most of its business out of Ft. Meade, which was also a factor for the company to move to bwtech@UMBC, as the research park is in close proximity to both Ft. Meade and BWI Thurgood Marshall Airport.

SITEC Consulting is based out of Cambridge, Maryland, and employs approximately fifty-two individuals, with six employees working out of the Cyber Incubator. SITEC expects to grow to fifteen at bwtech by the end of the 2011. The company is a Business Process Automation consulting and IT firm, providing customers with innovative technology, best practices, and quality professionals for both the Federal and Commercial markets.

SITEC offers website design, cyber application development, database development and administration, financial management, project management, and product training for its clients. The company also specializes in understanding graphic design and application development, content management, database administration and portals, and client training, all of which provides a successful program for their clients

“We are delighted that SITEC has joined our community of cybersecurity companies at bwtech@UMBC,” says Ellen Hemmerly, Executive Director of bwtech@UMBC Research and Technology Park. “SITEC Consulting is growing fast and currently employs 52 people. We look forward to accommodating SITEC's growth at our Park.”

“Moving to a HUBZone has allowed us to compete with similar cyber domain companies of the mid to large sizes,” says Duane Shugars, the Chief Strategy Officer at SITEC Consulting, “In addition, the relationship with UMBC helps our competitive position in terms of talented workforce.”

UMBC, www.umbc.edu, ranks fourth among U.S. research universities in the production of IT degrees and certificates, and it is the largest producer of such graduates among research universities in Maryland, Washington, D.C., and Virginia. The campus offers a master’s degree and a graduate certificate in cybersecurity, and it is rated a Center of Excellence in information assurance education and research. Thousands of UMBC graduates work in the intelligence community for key federal agencies and private partners.

bwtech@UMBC, www.bwtechumbc.com, located adjacent to UMBC’s campus, is a 71-acre research and technology community that is home to nearly 90 technology and life science companies. Over twenty of these companies are cybersecurity and 25 are life science companies.

About SITEC

SITEC was founded on, and follows, a corporate philosophy that has enabled the company to enhance their responsiveness to issues, and deliver the highest quality of customer service, called the “SI Touch Way”. The SI Touch Way is what makes them different. SITEC listens to their customers, and work together to find solutions to meet their needs. “We Care, We Listen, and When We Listen We Learn” by: seeking to fully understand the customer's vision, identifying issues, business needs, and challenges, recommending solutions, analyzing existing processes, and implementing what works best. Leveraging exceptional capabilities, experience, and practices SITEC enhances the customers overall ability to accomplish the mission. SITEC Consulting: Your trusted partner in “Delivering Tomorrow’s Solutions to Today’s Challenges.” For more information about SITEC Consulting, please visit <http://www.sitec-consulting.net/>
